PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience building APIs and web applications using JavaScript, Node.js, Express.js, and MongoDB. Experienced in authentication, payment integration, real-time applications, background jobs, push notifications, data aggregation, and third-party service integration. Built backend systems for virtual cinema and health-tracking platforms, alongside client web projects, with a focus on reliable and maintainable software.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python
Backend:	Node.js, Express.js, REST APIs, WebSockets, Socket.io
Databases:	MongoDB, Mongoose, Redis
Frontend:	React.js, HTML, CSS, Tailwind CSS
Authentication:	JWT, OTP, Magic Links, Role-Based Authorization
Services:	Paystack, Cloudinary, Cloudflare Stream, OneSignal, Firebase
Tools:	Git, GitHub, Postman, VS Code
Other:	Node-Cron, Day.js, MongoDB Aggregation

PROFESSIONAL EXPERIENCE

Backend Developer (V2) | MyLurah

Aug 2026 – Sep 2026 | Node.js, Express.js, MongoDB, Mongoose, JWT, Node-Cron, OneSignal, Day.js

- Built period and pregnancy tracking features, including cycle predictions, ovulation dates, and estimated due-date calculations.
- Developed MongoDB aggregation pipelines for health insights and reports based on symptoms, moods, and flow records.
- Built recurring medical appointments, preparation notes, and medication/wellness reminder features.
- Designed Node-Cron background jobs for scheduled health checks, educational content, appointments, and reminders.
- Integrated OneSignal push notifications and resolved an iOS notification delivery issue.
- Designed and documented API contracts for integration with the mobile development team.
- Live Website: <https://mylurah.com>

Web Developer | Greenfield E&P

July 2026 | Responsive Web Design, SEO

- Developed and deployed a corporate website for an oil and gas exploration and production company.
- Translated business requirements into responsive pages, an admin dashboard, and content-management features.
- Implemented SEO metadata, sitemap configuration, and search-engine indexing requirements.
- Configured domain and email integration and delivered the website to production.
- Live Website: www.greenfieldexplore.com

Backend Developer | Premia Virtual Cinema

Mar 2026 – Jun 2026 | Node.js, Express.js, MongoDB, Redis, WebSockets, Socket.io, Cloudinary, Cloudflare Stream

- Designed and developed backend services for a virtual cinema platform supporting user and admin operations.
- Implemented webhook-driven payment processing with unique payment references and idempotency controls to prevent duplicate transactions.

- Integrated Cloudflare Stream with secure, time-limited access tokens to prevent unauthorized video playback and access.
- Built real-time Watch Party features using Socket.io, including synchronized playback and host controls.
- Built admin and analytics features using MongoDB aggregation pipelines for transaction and engagement data.
- Implemented passwordless magic-link authentication with expiring tokens and HTTP-only cookies.

Web Development Intern | Edo Innovation Hub

Oct 2024 – Jan 2025 | Benin City, Nigeria

- Developed responsive interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Used Git/GitHub for version control and collaborative development.
- Built practical web projects and assisted with digital literacy training.

SELECTED PROJECTS

Hybrid Web-Based Phishing Detection System | Final Year Project

Python, XGBoost, SHAP, JavaScript, Tailwind CSS, Flask

- Developed a phishing detection system combining blacklist-based detection and machine learning.
- Built an XGBoost model using 57 URL-related features and SHAP for prediction explanations.
- Achieved 94.79% accuracy, 94.94% precision, 94.86% recall, and 94.90% F1-score.

Zeqah – Educational Support Platform

Lead Web Developer (Volunteer) | May 2026

HTML5, JavaScript (ES6+), Tailwind CSS, Firebase Authentication, Firestore

- Built a responsive platform supporting student admission guidance and IT skill development.
- Developed a custom CMS with Firebase Authentication and Firestore for blog management, including Markdown editing and live preview.
- Built blog search/filtering, lead-capture forms, and an admin dashboard for managing submissions.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science | University of Benin | 2026

CERTIFICATIONS

Backend Development Training Certificate | TechCrush Africa | May 2026

Backend Developer Assessment – TG Nexus Platform | Tobams Group | Aug 2026
